EDUCATION

Cornell University, College of Engineering

Bachelor of Science, Computer Science | Minor: Operations Research

Ithaca, NY

Anticipated Graduation: May 2028

GPA: 4.076, **SAT:** 1520 (Verbal: 730, Math: 790)

Relevant Coursework: Intro to Analysis of Algorithms, Intro to Machine Learning (NumPy, Pandas, PyTorch, Scikit-learn), OOP and Data Structures (Java), Functional Programming (OCaml), Language and Information, Networks, Discrete Structures

RELEVANT EXPERIENCE

Jahnel Group

Software Engineering Intern

Schenectady, NY

June 2026 – August 2026

- Built a points-based swag store for Jahnel Group, an Inc. 5000 company, using Next.js, React, and TypeScript with i18n in 3 languages
- Deployed to **GCP (Cloud Run + Cloud SQL)** with Dockerized CI/CD and keyless auth for 200+ employees across several countries
- Engineered a full-stack ATS, deployed on **AWS with S3** storage and a PostgreSQL backend, saving the company ~\$20K annually
- Launched the platform to manage 700+ daily applications, supporting the full hiring pipeline for recruiters, interviewers, and applicants

Cornell Bowers College of Computing and Information Science

Incoming Teaching Assistant | CS 4820/5820 – Introduction to Analysis of Algorithms

Ithaca, NY

August 2026 – Ongoing

- Personally selected by professor to serve as a TA for Cornell's **combined undergraduate and graduate-level** algorithms course
- Will lead weekly 20+ student discussion sections, grade homework and exams, and provide feedback on proof-based algorithm design

Idler / Widget Factory (YC Summer 25)

AI Problem Design & Quality Assurance Engineer

Remote

February 2026 – Ongoing

- Creating and refining programming and reasoning problems to evaluate the accuracy, robustness, and limitations of Idler's AI model
- Analyzing model responses against reference solutions to translate failure patterns into feedback used to improve model accuracy

IXL Center - Center for Innovation, Excellence and Leadership

Technology & Digital Consultant Intern

Remote

March 2025 – May 2025

- Designed a digital optimization roadmap for a small-business client, analyzing website UX, SEO structure, and scalability gaps
- Audited client website for UI consistency, search visibility, accessibility, and conversion rates, proposing actionable improvements
- Ranked **#1 weekly among 35+ consultant teams** for translating business needs into data-driven strategy and implementation plans

PROJECTS

Multi-Agent Research, Analyst, and Trading Platform, Cornell Fintech Club × Millennium | Python, LangGraph, Supabase

- Built multi-agent platform with LangGraph subagents, turning natural language ticker queries into reports, recommendations, and trades
- Programmed deterministic Python finance modules for KPI extraction, DCF/comps valuation, risk scoring, and recommendations
- Integrated Supabase state persistence and Alpaca paper trading with 365-day backtests, bracket orders, Sharpe, and drawdown metrics

Kappa Theta Pi Cornell Chapter Manager | Next.js, React, TypeScript, PostgreSQL, Supabase, Vercel

- Independently developed a full-stack management portal adopted by 50+ members, replacing manual spreadsheets for club operations
- Modeled a Postgres database with Prisma for point transactions, event scheduling, and leadership roles with permission-based access
- Deployed to Vercel with CI/CD from GitHub, backed by Supabase Postgres + Storage and Google OAuth on a Cornell email allowlist

School Scout, CS 4300 | school-scout.4300showcase.infosci.cornell.edu/ | Python, SQLite, TypeScript

- Built a SQLite database of college profiles by scraping Niche.com review data to power a natural-language college research system
- Developed a **RAG-based retrieval** pipeline using SVD/vector search to rank schools from reviews, summaries, and structured filters
- Designed a frontend with a query panel and interactive map view, displaying ranked college results alongside geographic school pins

LEADERSHIP & EXTRACURRICULARS

Cornell FinTech Club

Engineering New Member Education Lead & Financial Software Engineer

Ithaca, NY

February 2025 – Ongoing

- Taught weekly full-stack development workshops for new members, covering MERN-style application architecture and deployment
- Collaborated with both business analysts and product managers to develop numerous projects such as a Portfolio Optimization platform
- Built an agentic AI platform consisting of research, analyst, and trading agents in collaboration with Millennium Management

Kappa Theta Pi Professional Technology Fraternity

President

Ithaca, NY

February 2025 – Ongoing

- Led recruitment for **150+ applicants**, organizing info sessions, coordinating interviews, and leading deliberations to select a new class
- Managed a \$3,000+ semesterly budget, funding professional, social, philanthropic, and network events to drive engagement and impact
- Oversaw a 12-officer executive board, delegating tasks and ensuring successful planning & execution of chapter goals and initiatives

SKILLS

Languages: Python, Java, JavaScript / TypeScript, SQL, OCaml, HTML / CSS

Frameworks: React, Next.js, LangChain / LangGraph, Flask, Tailwind CSS, NumPy, Pandas, PyTorch, Scikit-learn

Databases & Tools: PostgreSQL, SQLite, Prisma, MongoDB, Supabase, Vercel, Docker, GCP, AWS, Git / GitHub, Postman
